Competitive Advantage

We deliver greater value by “thinking with you” to craft the best strategy for transforming your supply chain to achieve higher performance.

A Balanced Approach

We help organizations achieve world class levels of performance → defining strategy, improving processes, & leveraging the appropriate technology.

Strategy → Crafting an organization and culture that fosters growth and innovation.

Processes → Implementing processes which deliver world class levels of performance.

Technology → Leveraging technology to create a competitive advantage.

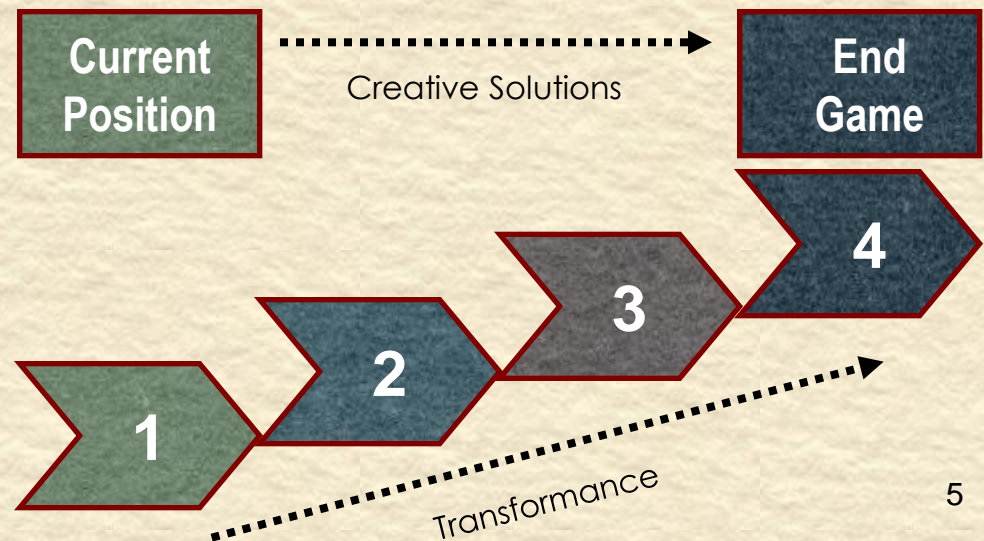

An Effective Approach

An executive's number one challenge is change management → how to transform an organization to the end game; fast and at optimal risk levels.

Traditional Approach

1. The big idea & the big technology purchase
2. Expectations for rapid transformation to the desired "end game"
3. Poor performance & inadequate ROI
4. Repeat the process; expect different results

Our effective approach improves speed, lowers risk, and increases ROI through the design of comprehensive programs for reaching the desired end game.

Certification Programs*

Certified Lean Master: Creating lean supply chains for manufacturing, distribution, retail, service, and virtual organizations. A multi-session program with a complete package of education and coaching on the creation of lean supply chains.

Certified Supply Chain Analyst: An ideal program for those just getting started in the field of supply chain management, individuals that come into contact with customers or suppliers, and those that will be part of improvement initiatives such as creating a lean supply chain or implementing an ERP system.

Certified Supply Chain Manager: Designed for current and future leaders in the field of supply chain management, providing individuals recognition as an expert with the knowledge to lead supply chain improvement initiatives.

*Sanctioned by the International Supply Chain Education Alliance (ISCEA) - www.iscea.com

Art Castings of Colorado
Filter-Tek
Sweetheart Cup
Micro Motion
Heraeus
Fisher Imaging

Trusted Advisors

It's the right time to engage us for accelerated supply chain transformations when...

- ☑ ***Expertise* will reduce the risk associated with supply chain transformations or major technology investments.**
- ☑ ***Proven methods* and templates are needed; resources are not justified for “re-creating the wheel.”**
- ☑ ***Knowledge* of best practices will provide insight for dramatic improvements required to “leap-frog” your competition.**
- ☑ ***Speed to ROI* is important to management, shareholders, and other stakeholders.**
- ☑ ***Current programs or technology* investments are not meeting expectations.**
